

Olga Pearce

Lawrence Livermore National Laboratory
P.O. Box 808, L-170 Livermore, CA, 94550
✉ olga@llnl.gov
<http://people.llnl.gov/olga>

Research Interests

Parallel and distributed computing, parallel algorithms and optimizations, distributed data structures, parallel performance modeling and optimization, application load balancing, parallel programming models, communication on heterogeneous architectures, generic parallel libraries and tools.

Education

- 2014 **Ph.D., Computer Science**, *Texas A&M University*.
Load Balancing Scientific Applications. Advisor: Prof. Nancy M. Amato, Ph.D.
- 2004 **B.S., Computer Science and Mathematics**, *Western Oregon University*, Magnum Cum Laude.
- 2000 **A.A., Business Administration**, *International Christian University*, Kyiv, Ukraine.

Professional Experience

- 2021-present **Texas A&M University, Department of Computer Science and Engineering**, *Associate Professor of Practice*.
- (Fall 2021) Teaching CSCE 435 Parallel Computing, 60 students
- 2014-present **Lawrence Livermore National Laboratory**, *Computer Scientist*.
- (2019-present) (879k/year) Principal Investigator for Performance Analysis and Visualization at Exascale (PAVE) Project, which includes the [Hatchet](#) project, a call-tree based tool for performance analysis of HPC applications [14, 17, 42].
 - (2018-present) LLNL application point of contact for CORAL1 and CORAL2 Tools Working Groups [41].
 - (2018-present) LLNL application point of contact for CORAL1 and CORAL2 Messaging Working Groups [3, 13, 40, 43, 44].
 - (2020-present) Predictive Science Academic Alliance Program (PSAAP) Tri-Lab Strategy Team, Center for Understandable, Performant Exascale Communication Systems, U. of New Mexico.
 - Developing techniques and tools for analyzing and optimizing performance of large scale multiphysics simulations on homogeneous and heterogeneous architectures, including [Caliper](#) [6, 45, 48, 24, 51, 52].
 - Developing techniques and tools for load balancing scientific applications [4, 19].
 - Developing parallel programming models and tools, including [RAJA](#) [5, 15, 16, 18, 46, 47, 53, 58].
 - Developing communication techniques for heterogeneous architectures [2]. Exploratory benchmark [Comb](#) [40, 43, 44]. Member of [MPI Hybrid & Accelerator Working Group](#).
- 2009-2014 **Lawrence Livermore National Laboratory**, *Lawrence Scholar*.
- Developed a model enabling the comparison of and selection among balancing algorithms for a specific state of a simulation [9].
 - Developed an accurate and fast method to evaluate and balance the load in N-Body simulations with highly non-uniform density, based on adaptive sampling [8].
 - Developed a framework for decoupling and offloading the load balance computation, enabling lazy load balancing [7].
- 2004-2009 **Texas A&M University, Department of Computer Science**, *Research Assistant*.
- Worked on distributed data structures in the Standard Template Adaptive Parallel Library (STAPL), a parallel superset of the C++ Standard Template Library [10, 20, 21].
 - Designed and implemented a set of parallel algorithms for STAPL. Assisted in development of the adaptive algorithm selection framework for STAPL [11].
 - Explored the idea of lock-free containers for multi-threaded programming.
 - Worked on a Dynamic Graph Composition Library for updating graph metrics of large, dynamic graphs.
- May-Oct 2007, **Lawrence Livermore National Laboratory**, *Research Intern*.
- July-Aug 2008 Worked on load balancing a multi-physics simulation via domain repartitioning and domain replication. Devised techniques to cheaply estimate processor loads and decide when a load imbalance needs to be corrected. Incorporated multi-constraint repartitioning (data parallelism) and domain replication (task parallelism) as a way to correct imbalance.

Conferences & Workshops Organized

- 2019-Present **Salishan Conference on High Speed Computing**, *Co-Chair*.
Conference on computer architecture, languages, and algorithms organized by the tri-labs (LLNL, LANL, Sandia). 150+ attendees.
- 2018-Present **JOWOG 34 Applied Computer Science (ACS)**, *Co-Chair*.
Scalable algorithms & simulation techniques for LLNL, LANL, Sandia (US) and AWE (UK). 150+ attendees.
- 2021-present **Summit Series**, *Co-organizer*.
NVIDIA and National Labs. 150+ attendees.
- 2018-2021 **Nuclear Explosives Code Development Conference (NECDC)**, *Co-Chair*.
Fundamental and applied research topics related to computational simulation. 300+ attendees.
- 2018 **Students@SC Program at ACM/IEEE Supercomputing Conference (SC)**, *Vice-chair*.
Organized 2-day program for undergraduate and graduate students at SC. 200+ attendees.

Committees

- 2022 **ACM/IEEE Supercomputing Conference (SC)**, *Chair, Progr. Frameworks and System Software*.
- 2022 **Platform for Advanced Scientific Computing (PASC)**, *Co-Chair, CompSci. & Applied Math*.
- 2022 **International Conference on Parallel Processing (ICPP)**, *Co-chair, Performance Papers*.
- 2021-present **Exascale Computing Project (ECP)**, *Software Technology Advisory and Review Team*.
- 2021 **International Conference on Supercomputing (ISC)**, *Chair, Ph.D. Forum*.
- 2021 **International Conference on Supercomputing (ISC)**, *HPC Algorithms and Applications Papers Committee Member*.
- 2019-2021 **Lawrence Livermore National Laboratory (LLNL)**, *Labwide Laboratory Directed Research and Development (LW LDRD) Committee Member*.
- 2020,2021 **IEEE International Parallel & Distributed Processing Symposium (IPDPS)**, *Programming Models and Compilers Papers Committee Member*.
- 2020 **ACM/IEEE Supercomputing Conference (SC)**, *Performance Papers Committee Member*.
- 2020 **EuroMPI**, *Technical Papers Committee Member*.
- 2019,2020 **IEEE Cluster**, *Programming and System Software Papers Committee Member*.
- 2020 **Journal of Concurrency and Computation**, *Reviewer*.
- 2020 **International Conference on Supercomputing (ISC)**, *Vice-Chair, Ph.D. Forum*.
- 2020 **International Conference on Supercomputing (ISC)**, *Tutorials Committee Member*.
- 2015-2019 **Lawrence Livermore National Laboratory (LLNL)**, *Computation Directorate representative on Livermore Graduate Scholar Program (LGSP) Committee*.
- 2015,2019 **ACM/IEEE Supercomputing Conference (SC)**, *Research Posters Committee Member*.
- 2019 **Lawrence Livermore National Laboratory (LLNL)**, *Science and Technology Awards Committee*.
- 2019 **International Conference on Supercomputing (ISC)**, *Ph.D. Forum Committee Member*.
- 2019 **IEEE International Parallel & Distributed Processing Symposium (IPDPS)**, *Multidisciplin*.
- 2019 **Journal of Signal Processing Systems**, *Reviewer*.
- 2018 **International Conference on Parallel Processing (ICPP)**, *Chair of the Software Track*.
- 2010,2011,2018 **ACM/IEEE Supercomputing Conference (SC)**, *Tutorials Committee Member*.
- 2018 **IEEE International Conference on Cluster Computing (Cluster)**, *System Software Track*.
- 2018-present **Parallel Computing Journal**, *Reviewer*.
- 2018 **IEEE International Parallel & Distributed Processing Symposium (IPDPS)**, *Progr. Models*.
- 2018 **IEEE/ACM Intl Conf Cluster, Cloud, & Grid Computing (CCGrid)**, *Perf. Modeling & Eval*.
- 2017 **EuroMPI/USA 2017**, *Research Posters Program Committee*.
- 2017 **ACM/IEEE Supercomputing Conference (SC)**, *Perf. Measurement, Modeling, and Tools*.
- 2017 **IEEE International Conference on Cluster Computing (Cluster)**, *Apps, Algos, & Libraries*.

- 2017 **International Conference on Parallel Processing (ICPP)**, *Software*.
- 2017 **IEEE International Parallel & Distributed Processing Symposium (IPDPS)**, *Software*.
- 2016,2017 **Grace Hopper Conference**, *Computer Systems Engineering*.
- 2015 **ACM/IEEE Supercomputing Conference (SC)**, *BoF: Progr. Languages, Models, & Compilers*.
- 2011 **Small Business Innovation Research (SBIR)**, *DOE Office of Science Grant Review*.
- 2011 **ACM/IEEE Supercomputing Conference (SC)**, *Student Cluster Challenge*.
- 2008 **ACM/IEEE Supercomputing Conference (SC)**, *Broader Engagement*.

Teaching and Mentoring

- 2021-present **Teaching**, *Texas A&M University, Department of Computer Science and Engineering*.
 - (Fall 2021) CSCE 435 Parallel Computing, 60 students
- 2020-present **Tutorials**.
 - (Nov 2021) ACM/IEEE Int'l Conf. for High Performance Computing, Networking, Storage, and Analysis (SC), full-day tutorial, "[User-centric Automated Performance Analysis of Hybrid Parallel Programs](#)"
 - (Mar 2021) Exascale Computing Project (ECP), full-day tutorial, "[Automating application performance analysis with Caliper, Spot, and Hatchet](#)"
 - (July 2020) Weapons Simulation Codes (WSC), 2 tutorials, "Performance Analysis With Hatchet"
- 2015-present **Student Research Mentoring**, *Lawrence Livermore National Laboratory*.
 - (Summer 2021 - Present) Gerald Collom, CS major (PhD), University of New Mexico. Working on persistent and partitioned MPI for heterogeneous architectures.
 - (Fall 2019 - Present) Bengisu Elis, CS major (PhD), Technical University of Munich, Germany. Working on research directions for MPI on heterogeneous architectures.
 - (Fall 2019 - Present) Suraj Kesavan, CS major (PhD), University of California Davis. Working on research directions for performance visualization.
 - (Summer 2020 - Present) Connor Scully-Allison, CS major (PhD), University of Arizona. Working on optimization of [Hatchet](#), a call-tree based tool for performance analysis of HPC applications.
 - (Spring 2020 - Present) Ian Lumsden, CS major (PhD), University of Tennessee. Working on a query language for [Hatchet](#), a call-tree based tool for performance analysis of HPC applications.
 - (Summer 2020) Kawthar Shafie Khorassani, CS major (PhD), The Ohio State University. Worked on GPUDirect Async Designs with MVAPICH2-GDR.
 - (Summer 2020) Katy Williams, CS major (PhD), University of Arizona. Worked on interactive tree visualization for [Hatchet](#), a call-tree based tool for performance analysis of HPC applications.
 - (Summer 2018 and 2019) David Eberius, CS major (PhD), University of Tennessee. Worked on porting [CoMD](#), an ExMatEx proxy application to [RAJA](#), and optimizing communication on GPUs. Worked on load balancing metrics for heterogeneous architectures.
 - (Summer 2018) Kewen Meng, CS major (PhD), University of Oregon. Worked on porting [CoMD](#), an ExMatEx proxy application to [RAJA](#), and optimizing performance for the CUDA RAJA backend.
 - (Summer 2016) Hadia Ahmed, CS major (PhD), University of Alabama at Birmingham. Studied performance impact of initial load imbalance and dynamic imbalance in the modified version of [CoMD](#), an ExMatEx proxy application.
 - (Summer 2015) Rasmus Larsen, CS major (MS), University of Copenhagen. Enabled overdecomposition and dynamic work redistribution in [CoMD](#), an ExMatEx proxy application. Implemented a mechanism for introducing initial load imbalance and varying the imbalance throughout the simulation to facilitate exploration of various load balancing schemes.
- 2007 **Student Team Mentoring**, *Cluster Challenge*, ACM/IEEE Supercomputing Conference (SC).
 - Mentored teams participating in the challenge, provided technical expertise in parallel performance and parallel applications ported by the teams to their clusters during the challenge.
- 2005-2009 **Student Research Mentoring**, *Texas A&M University*.
 - Jeremy Vu, CSE major, Texas A&M University. Worked on parallel algorithms in STAPL.
 - Harshvardhan, CS major, Texas A&M. Worked on STAPL Graph, Dynamic Graph Composition Library.
 - Kelli Bacon, CRA-W DMP Program. CE major, Gonzaga U. Dynamic Graph Composition Library.
 - Saransh Mittal, CSE major, Indian Inst. of Technology, Bombay. Dynamic Graph Composition Library.
 - Anna Tikhonova, CRA-W DMP Program. CS major, U. of San Francisco. Parallel algorithms in STAPL.
- 2006 **Fellow**, *Graduate Teaching Academy*, Texas A&M University.
- 2006 **Student Mentoring Award**, *Aggie Women in Comp. Science (AWICS)*, Texas A&M University.

Awards

- 2021 **Weapons Simulation Codes (WSC) Bronze Award**, *Lawrence Livermore National Laboratory*, Multi-physics team for developing GPU capabilities of the Next Gen multi-physics code, MARBL.
- 2021 **Computing Directorate Noteworthy Achievement Award**, *Lawrence Livermore National Laboratory*, for co-chairing three major technical meetings in a span of 3 months.
- 2020 **Weapons Simulation Codes (WSC) Monthly Award**, *Lawrence Livermore National Laboratory*, for leading the JOWOG 34 ACS meeting.
- 2020 **Design Physics Division (DPD) Bronze Award**, *Lawrence Livermore National Laboratory*, for authoring an article in Journal of Weapon Physics.
- 2019 **Weapons and Complex Integration (WCI) Gold Award**, *Lawrence Livermore National Laboratory*, for porting and optimization of programmatic application codes on Sierra.
- 2018 **Weapons Simulation Codes (WSC) Computational Physics Silver Star Award**, *Lawrence Livermore National Laboratory*, for developing and applying the RAJA performance portability programming model.
- 2015 **Deputy Director's for Science and Technology (DDS&T) Excellence in Publication Award**, *Lawrence Livermore National Laboratory*, for work in load balancing.
- 2009-2014 **Lawrence Graduate Scholar Program (LGSP)**, *Lawrence Livermore National Laboratory*.
Technical Supervisor: Bronis R. de Supinski, Ph.D.
- 2006-2009 **NSF Graduate Research Fellowship (NSF GRF)**, Texas A&M University.
- 2004-2007 Graduate Assistance if Areas of National Need Fellowship (**GAANN**), Texas A&M University.
- 2004-2005 Association of Former Students Fellowship, Texas A&M University.
- 2007-2011 Broader Engagement grant recipient, Supercomputing Conference.
- 2007 Award to attend CRA-W/CDC Programming Languages Workshop.
- 2005-2007 Award to attend and speak at CRA-W Grad Cohort, Computing Research Association.
- 2004 Award to attend Grace Hopper Conference and DMP reunion, Computing Research Association.
- 2003,2004 Distributed Mentor Project (**DMP**); Computing Research Association.
- 2004 Outstanding Senior in Computer Science; Western Oregon University.
- 2003 Outstanding Achievement in Computer Science, Outstanding Achievement in Mathematics.
- 2003 Who's Who Among Students in American Colleges and Universities, Phi Kappa Phi member.
- 1997 Future Leaders Exchange Program (**FLEX**); one of one hundred recipients nationwide.
U.S. Department of State, Freedom Support Act.

Skills

General	C/C++, Java, Python, git, svn, CVS, autotools, CMake.
High Performance Computing	Parallel performance tool development in C/C++. MPI profiling tools, runtime systems. Parallel algorithms and data structures. Measurement, analysis, and tuning of parallel applications on large clusters (IBM Blue Gene, Linux). Experience with large physics codes at LLNL.
Load Balancing	Measurement tools, load analysis metrics, (hyper)graph partitioners, load balancing algorithms.
Graduate Coursework	Algorithm Analysis, Parallel Algorithms, Generic Programming, Programming Languages, C++ Language Design, Computer Architecture, Compiler Design, Machine Learning, Numerical Methods, Supercomputing, and Runtime Systems.
Languages	English (fluent), Ukrainian (native), Russian (fluent)

Publications

Selected Refereed Publications. * denotes students I supervised.

- [53] **Olga Pearce**. Experiences Utilizing CPUs and GPUs for Computation Simultaneously on a Heterogeneous Node. In *DOE COE Performance Portability Meeting*, Denver, CO, USA, August 24, 2017. LLNL-PRES-737016.
- [54] **Olga Pearce**, Hadia Ahmed*, Rasmus W. Larsen*, and David F. Richards. Enabling Work Migration in CoMD to Study Dynamic Load Imbalance Solutions. In *JOWOG 34 Applied Computer Science*, Livermore, CA, USA, February 10, 2017. LLNL-PRES-708520.
- [55] David Beckingsale, **Olga Pearce**, and Todd Gamblin. Lightweight, Reusable Models for Dynamically Tuning Data-Dependent Code. In *SC'16*, Salt Lake City, UT, November 2016.
- [56] David Boehme, Todd Gamblin, Peer-Timo Bremer, **Olga Pearce**, and Martin Schulz. Caliper: Composite Performance Data Collection in HPC Codes. In *SC'15*, Austin, TX, November 2015.
- [57] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Improving Application Performance Through Affordable Load Balancing. In *Grace Hopper Conference*, Houston, TX, October 14, 2015. LLNL-POST-667498.
- [58] Rich Hornung, Holger Jones, Jeff Keasler, Rob Neely, **Olga Pearce**, Si Hammond, Christian Trott, Paul Lin, Courtenay Vaughan, Jeanine Cook, Mahesh Rajan, Rob Hoekstra, Ben Bergen, Josh Payne, and Geoff Womeldorff. ASC Tri-lab Co-design Level 2 Milestone Report. September 2015. LLNL-TR-677453.
- [59] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Improving Application Performance Through Affordable Load Balancing. In *LLNL Computation Directorate External Review Committee Meeting*, Livermore, CA, March 10, 2015. LLNL-POST-667498.
- [60] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Decoupled Load Balancing. In *Symposium on Principles and Practice of Parallel Programming (PPoPP)*, San Francisco, CA, February 8, 2015. LLNL-CONF-665393, LLNL-POST-666820.

- [61] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Tom Arsenlis, and Nancy M. Amato. Load Balancing N-Body Simulations with Highly Non-Uniform Density. In *JOWOG 34 Applied Computer Science*, Albuquerque, NM, February 4, 2015. LLNL-PRES-666427.
- [62] **Olga Pearce**. Load Balancing Scientific Applications. In *SC'14 Doctoral Showcase*, New Orleans, LA, November 20, 2014. LLNL-MI-657788, LLNL-PRES-664457. (36%).
- [63] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Tom Arsenlis, and Nancy M. Amato. Load Balancing N-Body Simulations with Highly Non-Uniform Density. In *Parasol Seminar*, College Station, TX, June 20, 2014. LLNL-PRES-654858.
- [64] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Tom Arsenlis, and Nancy M. Amato. Load Balancing N-Body Simulations with Highly Non-Uniform Density. In *Salishan Conference on High Speed Computing*, Gleneden Beach, Oregon, April 23, 2014. LLNL-POST-653183.
- [65] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Quantifying the Effectiveness of Load Balance Algorithms. In *Salishan Conference on High Speed Computing*, Gleneden Beach, Oregon, April 25, 2012. LLNL-POST-548645.
- [66] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Quantifying the Effectiveness of Load Balance Algorithms. In *Parasol Seminar*, Texas A&M University, College Station, TX, February 10, 2012. LLNL-PRES-527851.
- [67] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. A Topology-aware Application-independent Load Model for Parallel Codes. In *Stockpile Stewardship Support Project Workshop (SSSP)*, Texas A&M University, College Station, TX, November 10, 2011. LLNL-POST-507591.
- [68] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. A Topology-aware Application-independent Load Model for Parallel Codes. In *LLNL Lawrence Scholar Poster Session (LSP)*, Livermore, CA, October 25, 2011. LLNL-POST-507591.
- [69] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Load Balance: Correlating Application-Independent Measurements with Application-Semantic Computational Models. In *Supercomputing 2010 (SC'10)*, New Orleans, LA, November 16, 2010. LLNL-POST-461997.
- [70] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Modeling Load in Parallel Codes. In *Broader Engagement, Supercomputing 2010 (SC'10)*, New Orleans, LA, November 13, 2010. LLNL-PRES-462101.
- [71] **Olga Pearce**, Todd Gamblin, Bronis R. de Supinski, Martin Schulz, and Nancy M. Amato. Load Balancing Petascale Applications. In *LLNL Computation Postdoctoral Poster Session*, Livermore, CA, June 29, 2010. LLNL-POST-432915.
